

## REPUBLIC OF RWANDA MINISTRY OF HEALTH

### Update on COVID-19 Coronavirus — 30 March 2020

No new coronavirus cases were identified today. The total remains seventy (70).

All patients are under treatment in stable condition in an isolated health facility. The majority are asymptomatic, and no patient is in critical condition. The tracing of all contacts has been conducted for further management.

Heightened vigilance continues to be required. The enhanced prevention measures announced by the Government of Rwanda must be rigorously observed: **non-essential businesses are closed, travel between cities and districts is suspended, and non-essential movements outside the home are not permitted.** Any Rwandans or legal residents returning to the country will be subject to a mandatory 14-day quarantine at designated locations.

Continue to observe the instructions of health authorities, particularly washing hands regularly and maintaining physical distance from other people (at least 1 metre).

The **key symptoms of coronavirus** are dry cough, shortness of breath, and fever. Anyone experiencing these symptoms should call the toll-free number **114**, or dial **\*114#** for automated screening, or email **callcenter@rbc.gov.rw**, or send a WhatsApp message to **+250 788 20 20 80**, or contact a medical professional.

**Let's continue to work together to defeat this pandemic.**
